

Asem Mohamed Gamal

Cloud & DevOps Engineer

Cairo , Egypt | 01503178835 | [Gmail](#) | [LinkedIn](#)

Summary

Aspiring Cloud Computing and DevOps Engineer with a strong foundation in computer and communication engineering. Passionate about cloud infrastructure, automation, and CI/CD practices. Actively learning cloud platforms like AWS, Azure, and DevOps tools such as Docker, Kubernetes, and Jenkins. Seeking internships and training opportunities to apply technical skills, enhance practical experience, and contribute to scalable, reliable systems.

Education

- Faculty of engineering , Computer engineering department , Monfia University .
- 2022 – 2027
- 3.63/4

Experience

- **DevOps Intern | Digital Egypt Pioneers Initiative (DEPI) Jul 2026**
 - Acquiring hands-on experience in building CI/CD pipelines, containerization, and infrastructure automation.
 - **Technical Stack:** Linux (RHEL), Bash Scripting, Git, Docker, Kubernetes, Nginx, GitHub Actions, Ansible, Terraform, Prometheus, Grafana, and AWS Cloud.
- **Cloud Essentials | National Telecommunication Institute (NTI) Aug 2025**
 - Covered cloud service models (IaaS, PaaS, SaaS), virtualization, and networking architectures (VPC / Subnets).
 - Focused on high-availability design, security best practices, and resource management across AWS and Huawei Cloud.

Courses

- **Cloud Essentials | National Telecommunication Institute (NTI) Aug 2025**
 - Covered cloud service models (IaaS, PaaS, SaaS), virtualization, and networking
 - architectures (VPC / Subnets).
 - Focused on high-availability design, security best practices, and resource
 - management across AWS and Huawei Cloud.

Cloud services management and operation | NTI

Grasped core AWS infrastructure, security fundamentals, and cloud economics
Utilized core AWS services like EC2, S3, VPC, and Route 53 to architect scalable systems

Implemented robust security and access controls using IAM policies.
Optimized cloud operations and monitored infrastructure resources using CloudWatch

- **DevOps Foundations | Sprints x Microsoft Summer Camp | [[Certificate](#)]** Sep 2025
 - Completed a 40-hour intensive program covering core DevOps processes, containerization, and AWS cloud basics.
- **Red Hat System Administration I ,II | MaharaTech (ITI) | [[certificate](#)]**
 - Learned Linux administration fundamentals including user management, permissions, processes, and basic networking.

Licenses & Certifications

- **Huawei Certified Cloud Developer Associate (HCCDA) – Tech Essentials** Sep 2025 -
Credential ID : HWENDCTEDA562969 | [[Certificate](#)]
 - Gained comprehensive knowledge in Huawei Cloud services, including compute, storage, networking, security, and more.

Skills

Technical skills

- **Cloud Platforms:** (AWS, Huawei) . • **Version Control:** Git & GitHub .
- **Containerization:** Docker, Kubernetes • **Network** Fundamentals, **Nginx** web server.
- **Infrastructure as Code:** Terraform, Ansible. • **OS & Scripting** : Linux, Bash scripting.
- **Monitoring:** Prometheus, Grafana. • **Service Mesh & Observability:** Istio.
- **CI/CD & GitOps:** GitHub Actions

Soft skills

- Teamwork , Time management , Communication skills , Continuous Learning .
- **Languages** : English (Proficient) | Arabic (Native Language)
